To avoid abandonment of this application, applicant must timely file one of the following replies: (1) an amendment, affidavit, or other evidence, which places the application in condition for allowance; (2) a Notice of Appeal (with appeal fee) in compliance with 37 CFR 41.31; or (3) a Request for Continued Examination (RCE) in compliance with 37 CFR 1.114. Extensions of time may be obtained under 37 CFR 1.136(a). The date on which the petition under 37 CFR 1.136(a) and the appropriate extension fee have been filed is the date for purposes of determining the period of extension and the corresponding amount of the fee. The appropriate extension fee under 37 CFR 1.17(a) is calculated from: (1) the expiration date of the shortened statutory period for reply originally set in the final Office action; or (2) as set forth in (b) above, if checked. Any reply received by the Office later than three months after the mailing date of the final rejection, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Continuation of 11. does NOT place the application in condition for allowance because: The proposed amendment introduces the new limitation, "capable of withstanding", that is considered new matter because there is no adequate support for this limitation anywhere in the specification as originally presented. The specification provides the step of low-temperature compression bonding processing performed at a temperature of 100 to 250oC under pressure to form a laminate structure. However, there is nowhere in which the specification provides support for the adhesive film specifically "capable of withstanding" low-temperature compression bonding.
